

Sovereign Technology: Innovation | Assurance | Integration

About Us

Defendable Technologies is an Australian owned and operated technology company that develops technical solutions for challenging problems in high-risk industries and sectors.

Innovative Design and Development (IDD): Fusing operational best practice, industry standards, an intimate awareness of future-concepts, and real-world experience, our team provides IDD solutions to a range of clients.

Accelerated Capability Assurance (ACA): Applying relevant industry standards, methodologies and frameworks, our team conducts rapid analysis, assessment, and evaluation of emerging or extant capabilities.

Technical Systems Integration (TSI): Leveraging the skills, knowledge, and experience of its team, Defendable Technologies conducts rapid and effective, end-to-end programs of work for highly complex business challenges.

Flagship Product

The Stargate® Cross Domain Solution ingests and synchronises data from low/semi-trusted domains into high-trust domains, without exposing core enterprise networks to external attack.

Designed with military grade security patterns, available in both physical (on-prem) and virtual (off-prem) formats, and unencumbered by ITAR restrictions, it is suitable for use by:

- Defence and National Security
- Critical Infrastructure
- Energy and Resources

Discriminators

- Sovereign 100% Australian owned and operated
- Local Brisbane, QLD, based with National reach
- SIL Local manufacture and benchtop assessment capability
- Scale Access to over 100 security cleared ICT & Engineering professionals
- DISP Accredited against all pillars
- Trusted Industry and Sector wide relationships

Standards and Frameworks

Defendable Technologies builds all cyber products, and delivers all cyber outcomes, with alignment to industry best practice, including but not limited to:

- | | | | | |
|------------------|------------|---------------|-----------|------|
